Professional Summary

Data Analyst with hands-on experience in Python, SQL, Excel, and Power BI, specializing in business analytics, business intelligence, EDA, data cleaning, and dashboard development. Skilled in transforming raw data into actionable business insights through statistical analysis, forecasting, and machine learning. Proven ability to design KPI reports, automate reporting workflows, and communicate findings to stakeholders for data-driven decision making. Passionate about data visualization, problem solving, and delivering measurable business impact.

Technical Skills

- **Programming:** Python, SQL
- **Analytics:** Data Cleaning, Data Wrangling, EDA, Business Analytics, Business Intelligence, Statistical Analysis, Reporting
- **Visualization:** Power BI, Excel, Matplotlib, Seaborn
- **Machine Learning:** Regression, Classification, Forecasting, Scikit-learn
- **Databases:** MySQL, PostgreSQL, SQLite
- **Tools:** Git, GitHub, Jupyter Notebook, VS Code, FastAPI, React
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication, Presentation, Critical Thinking, Business Reporting, Stakeholder Management

Experience

Open Source Contributor – GirlScript Summer of Code (GSSoC) Remote
Open Source Contributor 2024 – Present

- Contributed to open-source data analytics and web development projects, submitting pull requests and collaborating with distributed contributor teams.
- Applied Python and SQL skills to improve data-driven features in real-world repositories used by 100+ contributors.

Technical Blogger – Hashnode Remote
Independent Author 2024 – Present

- Authored technical articles on data analytics, SQL, Python, and business intelligence to support the developer community, simplifying complex reporting concepts for a growing readership.

Featured Projects

Retail Sales Forecasting Platform [GitHub](#)
[Live Demo](#)
Python, SQL, Excel, Power BI, FastAPI, React, SQLite, Scikit-learn

- Performed data cleaning and EDA using Python (Pandas, NumPy, Matplotlib, Seaborn) to uncover sales trends.
- Built interactive Power BI dashboards and Excel reports (Pivot Tables, Power Query, KPIs) for business decision making.
- Wrote advanced SQL (Joins, Aggregations, Window Functions, CTEs) for reporting and trend analysis.
- Built ML forecasting models with Scikit-learn and integrated a FastAPI backend with a React frontend.

Superstore Sales Analysis [GitHub](#)
Python, SQL, Excel, Power BI

- Performed end-to-end retail sales analysis, cleaning and transforming raw datasets using Python.
- Created Power BI dashboards and Excel reports (Pivot Tables, Charts, Power Query) for visual analytics.
- Used SQL for customer segmentation, sales trend analysis, ranking, and KPI reporting.
- Identified the most profitable regions and segments, delivering data-backed business recommendations.

Supplement Sales Analytics using PostgreSQL [GitHub](#)
PostgreSQL, SQL, Excel, Power BI

- Designed a PostgreSQL database; used advanced SQL (CTEs, Views, Joins, Window Functions, Subqueries).
- Generated executive business reports and KPI dashboards by connecting SQL output with Power BI and Excel.
- Performed customer segmentation and analyzed monthly sales trends to generate inventory insights.

Education

Bachelor of Technology, Computer Science Engineering (Data Science) 2023 – 2027
Maharishi Dayanand University , Rohtak CGPA: 8.23/10

Certifications

Advanced Certificate in Data Science & Engineering | Postman API Fundamentals Student Expert | Python Certification
| SQL Certification | Power BI Certification | Machine Learning Certification

Open Source & Achievements

- GirlScript Summer of Code (GSSoC) Contributor – collaborative development and community-driven contributions
- Active GitHub Open Source Contributor with multiple merged pull requests across data analytics repositories
- Built and maintain 30+ GitHub projects spanning data analytics, web development, and machine learning
- Solved 100+ DSA problems on competitive coding platforms; active Hashnode blogger with a personal portfolio site
